## THE BUREAU OF DIPLOMATIC SECURITY

---

The Bureau of Diplomatic Security (DS) is the law enforcement and security arm of the U.S. Department of State, providing a secure environment for the conduct of American diplomacy. To advance American interests and foreign policy, DS protects people, property, and information at more than 285 State Department missions worldwide. As a leader in international investigations, threat analysis, cyber security, counterterrorism, and security technology, DS is the most widely represented U.S. security and law enforcement organization in the world.

Political Violence Against Americans is produced by the Bureau's Directorate of Threat Investigations and Analysis (DS/TIA), in order to provide readers with a comprehensive picture of the spectrum of politically motivated threats and violence that American citizens and interests encounter abroad on an annual basis. Created in May 2008, the Directorate of Threat Investigations and Analysis strives to improve Diplomatic Security's ability to detect and counter threats, and to upgrade the Bureau's capacity to rapidly disseminate threat and security information to our embassies, consulates, and the U.S. private sector.

## INTRODUCTION

---

The global threat environment has increased dramatically in recent years. In an effort to advance political and ideological causes, for example, extremist groups and individuals of every stripe now utilize a broad array of methods and venues to terrorize, injure, and kill priority targets, while seeking to foment disturbances and chaos within society more generally.

Political Violence Against Americans is a report to the American people that focuses on major incidents of anti-U.S. violence and terrorism, with apparent political motivations, that occurred worldwide during 2008. The U.S. Department of State closely monitors and maintains information on threats to Americans overseas – from terrorism and organized violence, to street crimes and health hazards – and makes this information freely available. It is the policy of the U.S. Government that no double standard shall exist regarding the dissemination of threat information that affects U.S. citizens. Government employees may not benefit unfairly by access to, or possession of privileged information that applies equally to all Americans.

In view of the enormous number of hostile incidents that occur universally in the course of a year, the particular events cited in Political Violence Against Americans were selected based upon certain specific criteria in addition to their political nature, including one or more of the following: the presence of casualties, substantial property damage, or the use of unusual tactics and weapons, together with a perception of the targets as intentionally those of the United States, or representative of U.S. interests. The incidents included here were reported to Department of State Diplomatic Security personnel posted at U.S. missions worldwide, and comprise the best information (sometimes incomplete) that is available. Some incidents are never reported to U.S. officials, of course. A few unique incidents have been omitted due to their sensitive nature, as have the names of American citizens for privacy purposes.

### A SPECIAL NOTE REGARDING AFGHANISTAN AND IRAQ

Compiling a comprehensive chronology of anti-American violence in the war zone environments of Afghanistan and Iraq presents unique challenges. Given the complex security context within both countries, it is understandably difficult to obtain detailed, reliable information on every incident involving Americans, and sometimes nearly impossible to distinguish acts of targeted political violence and terrorism from general war zone hazards. Recognizing this, we have limited our reports of incidents in Afghanistan and Iraq to those involving targets under U.S. Chief of Mission authority. In addition, instances of rocket and mortar attacks against U.S. diplomatic facilities are included only when they resulted in casualties or significant property damage. Although not a perfect method for distinguishing between violent incidents, these criteria provide a certain practical standard for listing assaults most relevant to this report.

A passenger got out of the second vehicle and fired multiple rounds into the USAID vehicle, instantly killing the driver and fatally wounding the USAID officer, who later died at a local hospital. When the American could not change the tire, the three gunmen walked away to get help. At that point, the American family drove away on the flat tire. In due course they came upon a government checkpoint, where they were rescued. It is likely the victims were kidnapped because they were foreigners and not specifically because they were Americans.

# INCIDENTS OF VIOLENCE

## January 15 – Beirut, Lebanon

A U.S. Embassy vehicle was damaged by a vehicle-borne improvised explosive device (VBIED) parked on the side of the road in the Karantina-Dora area of Beirut, at 4:25 p.m. The Embassy vehicle was returning to the Embassy from Beirut International Airport. The explosion caused massive damage to the surrounding buildings and vehicles. Four persons were killed in the explosion, and approximately 40 others were injured including two Embassy locally employed staff members and an American tourist. No group has claimed responsibility for the attack.

**April 6 – Sana'a, Yemen**

Three mortars were launched against the al-Hadda western residential compound. Many U.S. Embassy employees reside in al-Hadda, in addition to numerous others from the West. There were no reported injuries, and damage to buildings on the compound was minimal.

**April 10 – Sana'a, Yemen**

Two unexploded improvised explosive devices were discovered near the west wall of the al-Hadda residential complex. The configuration was similar to two IEDs found in the office compound of the Canadian oil company Nexen on the same day. One of the IEDs detonated, but no casualties resulted. Yemeni security forces made one arrest in connection with the planted explosives.

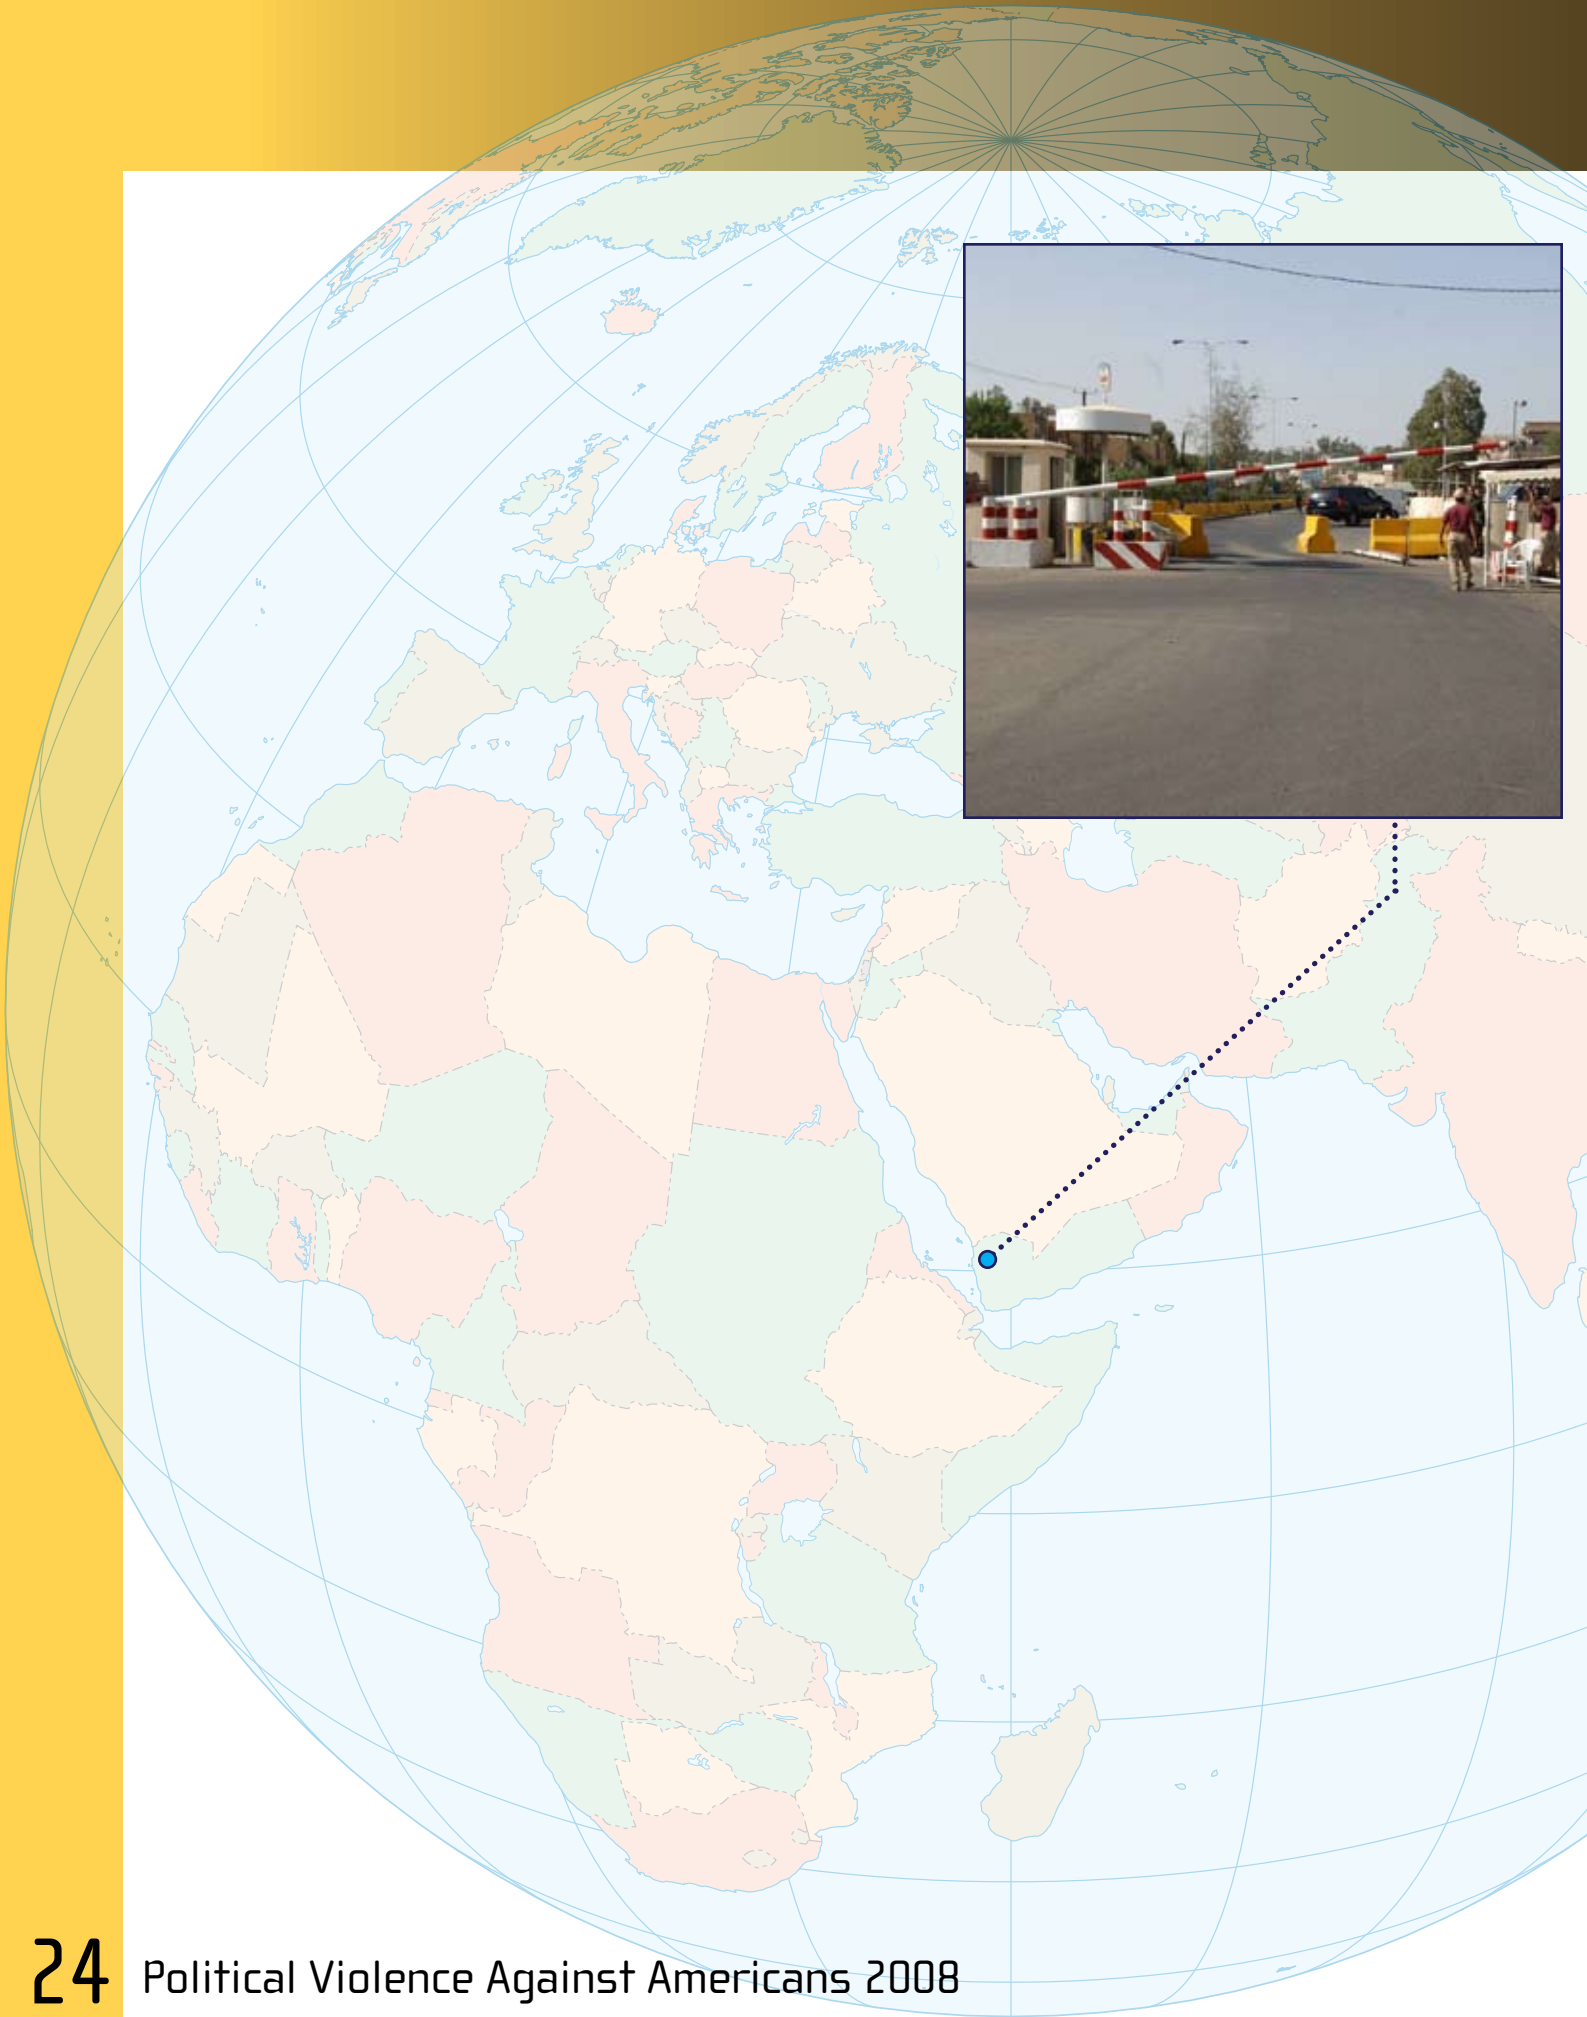

# INCIDENTS OF VIOLENCE

## March 18 – Sana'a, Yemen

Four mortars were launched against the U.S. Embassy compound resulting in injuries to several Yemeni soldiers; U.S. facilities sustained little or no damage.

# INCIDENTS OF VIOLENCE

## September 17 – Sana'a, Yemen

At approximately 9:13 a.m., a vehicle disguised as an official Yemeni Government vehicle approached the first entrance checkpoint at the U.S. Embassy. Inside the vehicle were three gunmen, a driver, and a passenger, all wearing Ministry of Interior Central Security Force (CSF) uniforms and explosive vests. At the vehicle entrance checkpoint, one of the gunmen stood up through the vehicle roof and shot and killed a Local Guard Force member who was manning the drop-arm barrier. Simultaneously, three other gunmen exited the vehicle and shot and killed a member of the CSF who stood nearby. Approximately 20 seconds later, a second vehicle containing a driver and passenger wearing CSF uniforms and explosive vests arrived on the scene. Both vehicles were rigged as vehicle-borne explosive devices.

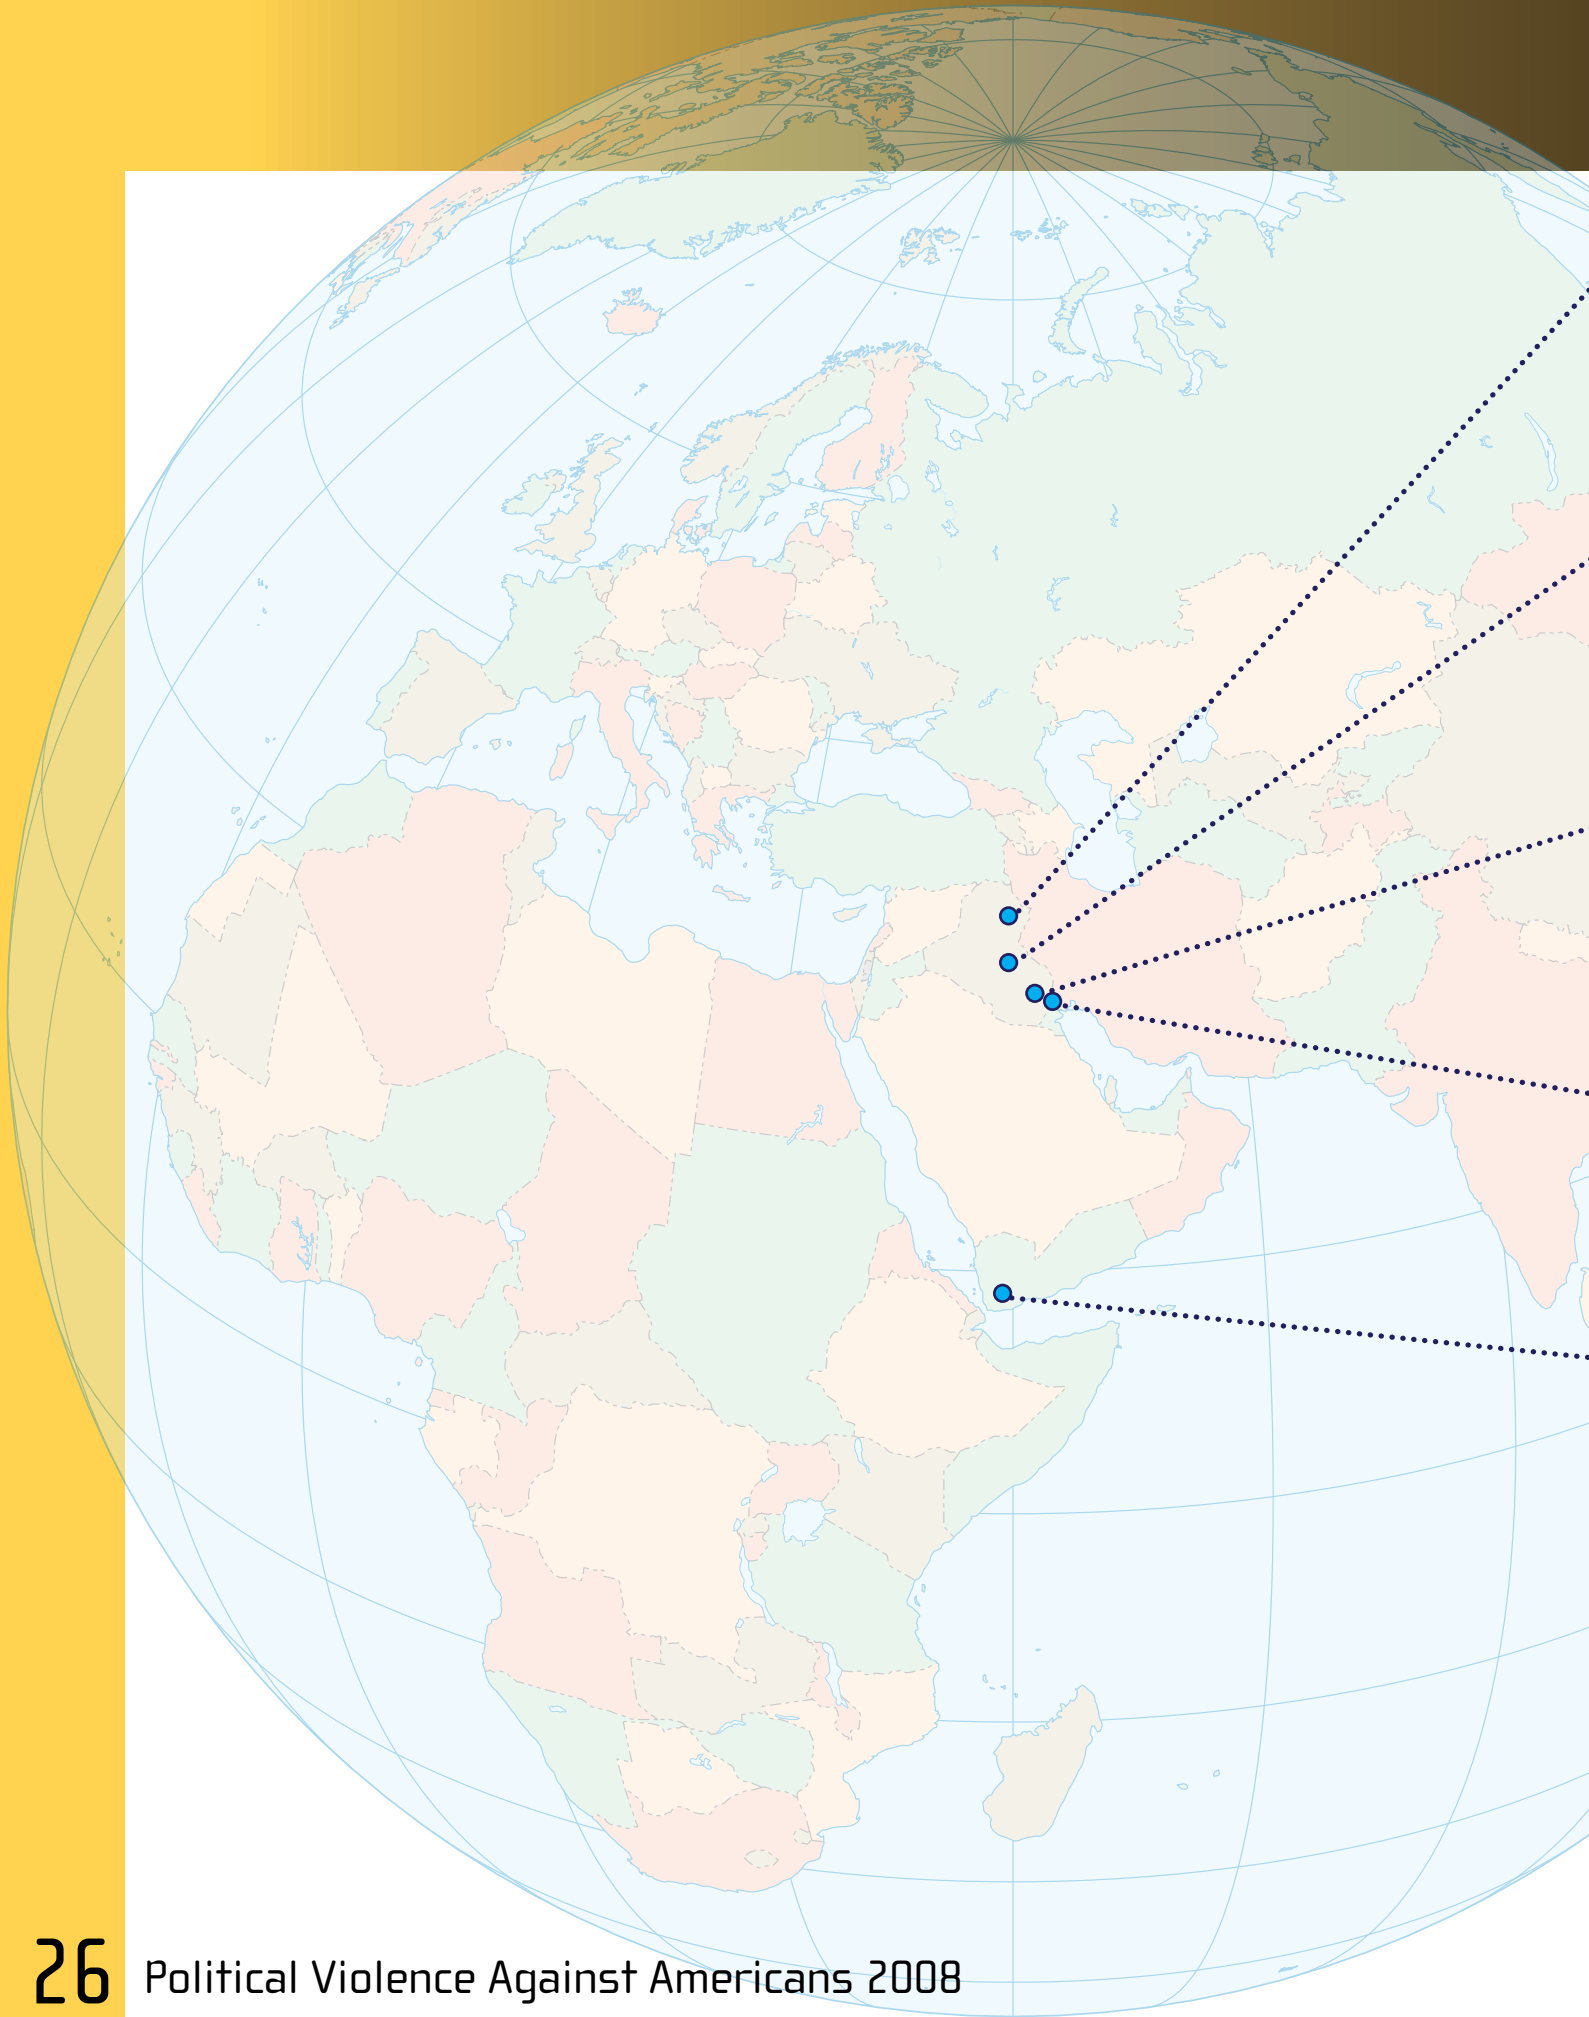

The two vehicles then proceeded down the external Embassy access road, and three of the gunmen followed on foot. As the first vehicle drove toward the Embassy main entrance gate, its occupants opened fire on host-nation security forces stationed along the roadway, and then detonated. The second vehicle drove through the wreckage and proceeded towards the Embassy's main wall. Meanwhile, the three terrorists on foot had arrived at the same location along the post's main perimeter wall. One of the gunmen on foot then shot and killed an American woman and her husband.

After the second vehicle detonated approximately 50 yards from the Embassy's main entrance, the three terrorists on foot fired their weapons into the Embassy compound, and one of them detonated his explosive vest. The remaining two terrorists shot indiscriminately into the Embassy compound; no one was injured. A second terrorist then detonated his explosive vest. The bomber was killed but no one else was hurt. The remaining terrorist returned and detonated his suicide vest near the entrance checkpoint where the attack began. The attack resulted in the deaths of 18 persons, including one American. No Americans were among the injured.

Following the attack, a group called the Islamic Jihad Organization of Yemen claimed responsibility. The group is likely affiliated with al-Qaida. Al-Qaida-linked groups are believed responsible for previous terrorist attacks in Yemen, including a July 2007 attack in which eight Spanish tourists were killed in Ma'rib, as well as the January 2008 small arms attack against Belgian tourists in Hadhramawt Governate.

# INCIDENTS OF VIOLENCE

## April 21 – Kirkuk, Iraq

A roadside improvised explosive device detonated on the left side of the road as a Chief of Mission motorcade passed by. The protective security car traveling behind the COM's vehicle sustained most of the damage; however there were no serious injuries to any personnel.

## April 23 – Al-Hillah, Iraq

A roadside improvised explosive device detonated several yards in front of an Embassy security advance vehicle while en route to a local venue. The security vehicle was damaged, rendering the vehicle inoperative. Occupants left the vehicle and returned safely to the Regional Embassy Office in al-Hillah.

## March 18 – Tallil, Iraq

U.S. Embassy helicopters were transporting USAID officials from Tallil to Baghdad when electronic countermeasures sounded an alarm and the pilots took evasive action. Crew members observed a spiral smoke trail. No personnel were injured and no damage to the helicopter was sustained.

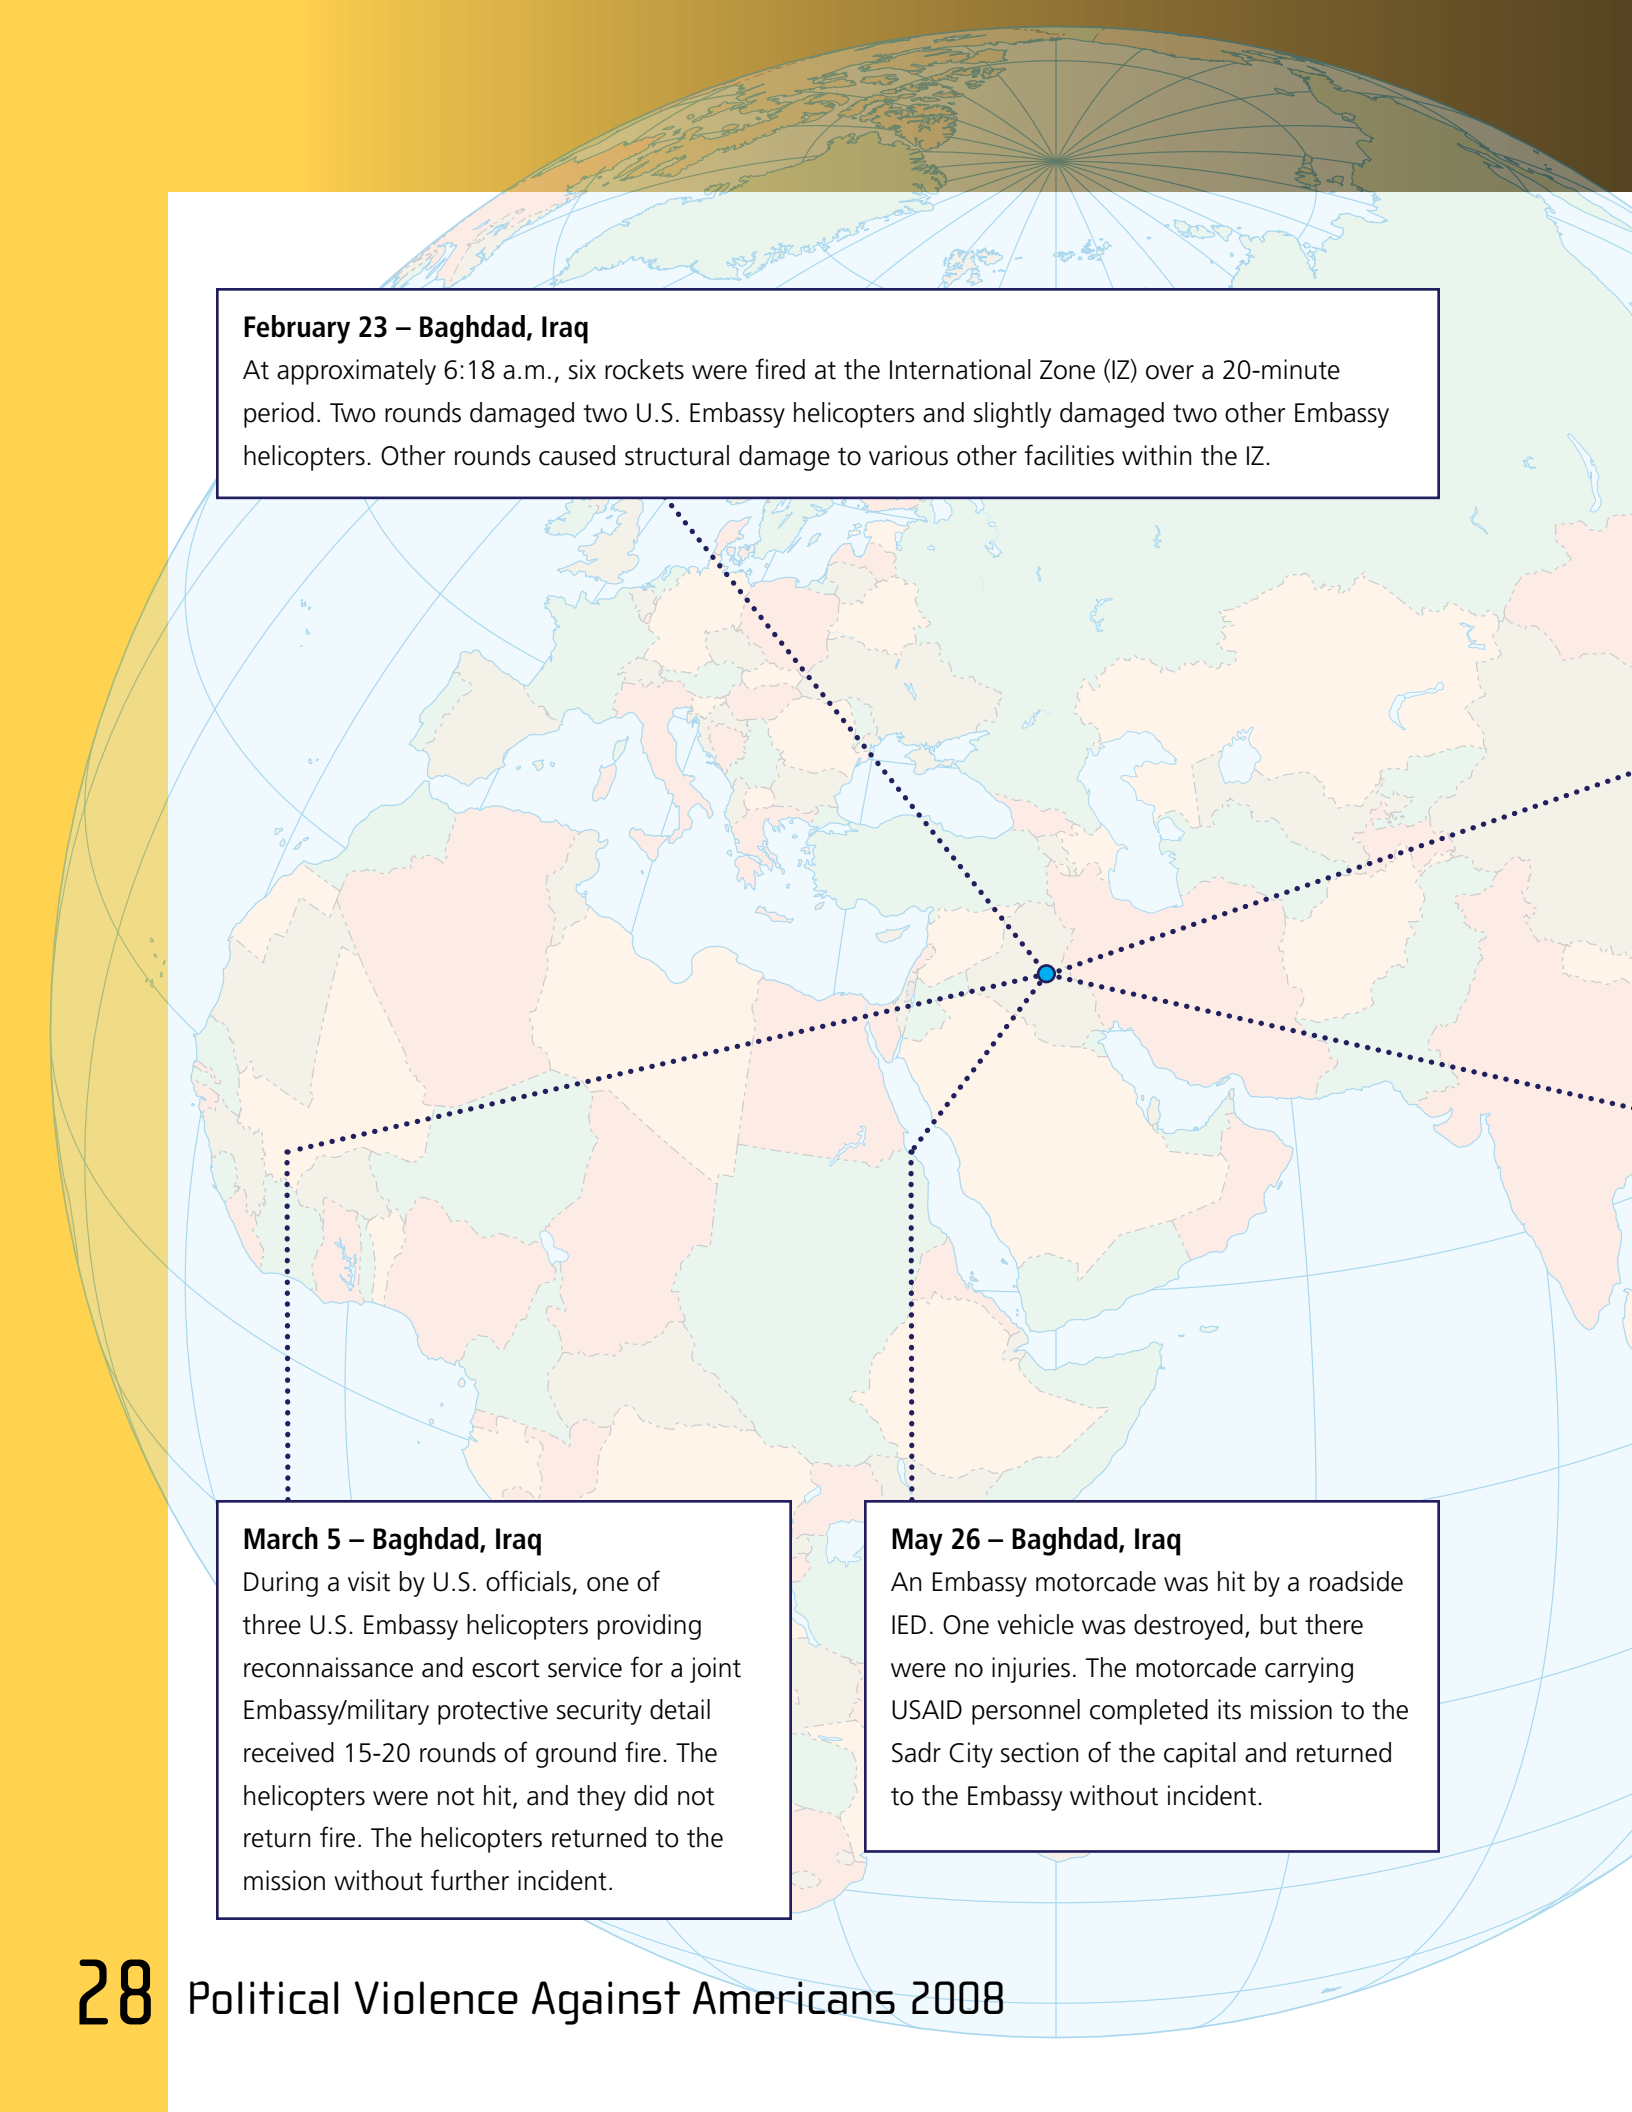

## August 28 – Basrah, Iraq

Two rockets were fired at Basrah Air Station at approximately 8:24 p.m. One rocket penetrated the overhead cover of the Regional Embassy Office located at the Station, and passed through two trailers before embedding in the ground. No one was injured in the attack.

## September 29 – Dhamar, Yemen

As an American couple and their three children were traveling between the Sana'a security checkpoint and the city of Dhamar, a vehicle with four men pulled alongside their vehicle at approximately 3:00 p.m. and motioned for them to pull over. The American ignored them and continued driving. The vehicle then pulled alongside the American's car and attempted to force the Americans off the road. The men inside were brandishing weapons. The American pulled his vehicle over to the side of the road and three of the men got into the American's vehicle, driving off with the family in the car. The husband offered them money, but they indicated that they were not interested in money or the car. They said that they wanted something from the Yemeni government, but did not elaborate.

For the next several hours, the gunmen drove their kidnap victims past several villages. By nightfall, they were driving on rocky terrain and the left rear tire had a blowout. The men told the American to change the tire, but he did not know how to release the spare tire underneath the carriage. The kidnapers told the Americans to stay where they were and walked away to get help. The American family got back in the car and drove away on the flat tire. In due course, they came upon a government checkpoint outside Dhamar, where the Americans were rescued.

**February 23 – Baghdad, Iraq**

At approximately 6:18 a.m., six rockets were fired at the International Zone (IZ) over a 20-minute period. Two rounds damaged two U.S. Embassy helicopters and slightly damaged two other Embassy helicopters. Other rounds caused structural damage to various other facilities within the IZ.

**March 5 – Baghdad, Iraq**

During a visit by U.S. officials, one of three U.S. Embassy helicopters providing reconnaissance and escort service for a joint Embassy/military protective security detail received 15-20 rounds of ground fire. The helicopters were not hit, and they did not return fire. The helicopters returned to the mission without further incident.

**May 26 – Baghdad, Iraq**

An Embassy motorcade was hit by a roadside IED. One vehicle was destroyed, but there were no injuries. The motorcade carrying USAID personnel completed its mission to the Sadr City section of the capital and returned to the Embassy without incident.

# INCIDENTS OF VIOLENCE

## March 22-31 – Baghdad, Iraq

Unidentified individuals launched 42 separate indirect fire attacks against the International Zone. The attacks resulted in the deaths of two U.S. Chief of Mission personnel and one local national; wounded 15 U.S. citizens, six third-country nationals, and 12 local nationals; and damaged several facilities, vehicles, and air assets.

## June 24 – Baghdad, Iraq

An improvised explosive device detonated at approximately 9:30 a.m. inside a District Advisory Council (DAC) building in Sadr City, where embedded Provincial Reconstruction Team (PRT) members had arrived to attend a scheduled meeting. The explosion killed four Americans (a U.S. Department of State employee, a U.S. Department of Defense contractor, and two U.S. military members) and one third-country national who was working for the PRT. One U.S. military officer and one Iraqi army officer sustained injuries. An Iraqi DAC member also was wounded in the attack. While it appears that the Chief of Mission and/or Department of Defense personnel were specifically targeted in this incident, there was speculation that the injured Iraqi DAC member may have been the intended target. Reports indicate that the member had received earlier death threats linked to his interaction with the U.S. Government and Coalition Forces in Iraq.

### **November 26-27 – Mumbai, India**

At least 10 suspected Lashkar-e-Tayyiba terrorists, operating under the cover name Deccan Mujahidin, launched a coordinated attack using AK-47 assault weapons and grenades against various locals in southern Mumbai. The operatives arrived by boat from the coast and reportedly had access to information regarding the targeted locals, gathered from intense surveillance conducted at least a year in advance of the attack. The terrorists organized themselves into four teams, with one two-man team targeting the train station and hospital; another team targeting the Trident-Oberoi Hotel; and a third team striking a Jewish Center. The fourth team of four men targeted the Taj Mahal Hotel. Confrontations with police lasted 60 hours and resulted in at least 183 deaths, including 22 foreigners, six of whom were American. Three of the Americans were killed at the Trident-Oberoi Hotel, and three others were killed at the Jewish Center. Over 300 others were injured, including three Americans.

## CONCLUSION

---

Evidence indicates that the overseas security environment generally remains hazardous, with many extremist groups and individuals intent on promoting political and ideological causes through violence and social disruptions. In many instances, Americans and U.S. interests appear to be targeted intentionally, while in other cases Americans are victimized randomly along with other nationalities. In any case, the need for constant vigilance, awareness of surroundings, and avoidance of potentially dangerous situations should be obvious.

Reasonable precautions can significantly minimize vulnerability. Information regarding the incidence of violence, and the nature of assaults, can be useful for this purpose. Towards this end, it is hoped that Political Violence Against Americans will prove to be a valuable resource.
